2. The Project Manager shall decide whether and by how much to extend the Intended Completion Date within twenty one (21) days of the Contractor asking the Project Manager for a decision upon the effect of Variation and submitting full supporting information. The notice shall be given as soon as practicable, and not later than 30 days after the Contractor became aware, or should have become aware, of the event or circumstance.
4. If the Contractor fails to give notice of a claim within such a period of 30 days, the Procuring Agency shall be discharged from all liability in connection with the claim.

C. Quality Control

29. Identifying Defects

1. The Project Manager shall check the Contractor's EPC and notify the Contractor of any Defects that are found. Such checking shall not affect the Contractor's responsibilities to ensure the quality of EPC

executed. The Project Manager may instruct the Contractor to search for a Defect and to uncover and test any EPC that the Project Manager considers may have a Defect

30. Tests

1. If the Project Manager instructs the Contractor to carry out a test not specified in the Specifications to check whether any EPC has a Defect and the test shows that it does, the Contractor shall pay for the test and any samples. If there is no Defect, the test shall be a Compensation Event.

1. The Project Manager shall give notice to the Contractor of any Defects before the end of the Defects Liability Period, which begins at Completion, and is defined in the SCC. The Defects Liability Period shall be extended for as long as Defects remain to be corrected.
2. Every time notice of a Defect is given; the Contractor shall correct the notified Defect within the length of time specified by the Project Manager's notice.
3. Except in cases of gross negligence or willful misconduct:
 - a) neither Party shall be liable to the other Party, whether in contract, tort or otherwise, for any indirect or consequential loss or damage, including loss of use, loss of production, loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the Bidder to pay liquidated damages to the DoE; and
 - b) the aggregate liability of the Bidder to the DoE, whether under the Contract, in tort or otherwise, shall not exceed the total Contract Price, provided that this limitation shall not apply to the cost of repairing or replacing defective equipment, or to any obligation of the Bidder to indemnify the DoE with respect to patent infringement.
4. In all cases, the Party claiming a breach of Contract or a right to be indemnified in accordance with the Contract shall take all reasonable measures to mitigate the loss or damage.

32. Extended Defect Liability Period

1. In addition to the Defects Liability Period specified under Clause 31, the Bidder shall provide an extended Defects Liability Period for the relevant equipment of the plant, specified in the SCC and shall furnish additional security, in the form of a Bank Guarantee, equivalent to the 10% of the contract amount and valid for the duration of such extension.
2. The extended Defects Liability Period shall be in accordance with the equipment guarantee/warranty provided by the respective manufacturers.

33. Uncorrected Defects

1. If the Contractor has not corrected a Defect within the time specified in the Project Manager's notice, the Project Manager shall assess the cost of having the Defect corrected, and the Contractor shall pay this amount to the Procuring Agency. At the option of the Procuring Agency, payment of such costs may be made in whole or in part by the Procuring Agency deducting and keeping for itself appropriate amounts from the Retention Money and/or claiming against any Bank Guarantee provided by the Contractor pursuant to GCC Clause 46.

D. Cost Control

34. Bill of Quantities

1. The Bill of Quantities shall contain items for the construction, installation, testing and commissioning EPC to be done by the Contractor.
2. The Bill of Quantities is used to calculate the Contract Price. The Contractor is paid for the quantity of the EPC done at the rate in the Bill of Quantities for each item. The EPC done shall be acceptable and fit for purpose.

35. Performance Security

1. Prior to signing of contract, the contractor should have furnished performance security. Following the successful completion of the Contract, the Procuring Agency shall return the Performance Security to the Contractor within fourteen (14) days of receipt of the Certificate of Completion.
2. The Procuring Agency reserves the right to encash the Performance Security in order to prevent its lapse, in the event the contractor fails to extend its validity. The Project Manager shall issue a formal

reminder to the contractor at least thirty (30) days prior to the expiry date, thereby allowing the contractor a period of twenty-one (21) days to effect the required extension. Should the contractor fail to comply within this timeframe, the Project Manager shall notify the relevant Financial Institution of the intent to encash the Performance Security no later than seven (7) days prior to its expiration, to ensure the security remains enforceable.

3. The Performance Security (including additional Performance Security under seriously unbalanced and/or frontloaded Bid) shall be payable to the Procuring Agency as compensation for any loss resulting from the contractor's failure to complete its obligations under the contract. However, the performance security shall not be forfeited outrightly.

36. Mobilization Advance

2. The Procuring Agency shall make Mobilization advance payment of Ten percent (10%) to the Contractor against provision by the Contractor of an Unconditional Bank Guarantee in the form and by a bank acceptable to the Procuring Agency in amounts and currencies equal to the Advance Payment. The Guarantee shall remain effective until the Advance Payment has been repaid, but the amount of the Guarantee shall be progressively reduced by the amounts repaid by the Contractor.
3. The Contractor is to use the Mobilization advance only to pay for Equipment, Plant, Materials and mobilization expenses required specifically for execution of the Contract. The contractor shall demonstrate that advance has been used in this way by supplying copies of invoices or other documents to the project manager. The Manager shall encash the advance guarantee if the contractor is in breach of its obligation by using the advance payment for purposes other than the costs of mobilization in respect of the works.
4. The advance payment shall be repaid by deducting proportionate amounts from payments otherwise due to the Contractor, following the schedule of completed percentages of the Works on a payment basis. The Mobilization Advance shall be recovered when 100 percent (100%) of the contract is executed. No account shall be taken of the advance payment or its repayment in assessing valuations of work done, Variations, price adjustments, Compensation Events, Bonuses or Liquidated Damages.

37. Variations

1. The Project Manager shall order any variation of the form, quality or quantity of the EPC or any part thereof that may, in his opinion, be necessary. Each variation may include, but is not limited to, any of the following:
 - (a) increase or decrease in the quantity of any EPC included in the Contract;
 - (b) omission of any item of EPC;
 - (c) change in the character or quality or kind of any such EPC;
 - (d) change in the levels, lines, position and dimensions of any part of the EPC;
 - (e) additional EPC of any kind, provided its within the scope of present EPC;
 - (f) change in any specified sequence or timing of construction activities.
2. Additional EPC may be awarded without a new procurement procedure up to 25 % of the initial contract price, under specific conditions:
 - (a) Must be for unforeseen circumstances and not due to lack of comprehensive planning and cannot be fundamentally different from the original contract. If additional EPC alter the fundamental nature or objectives of the project, a new procurement process must be initiated.
 - (b) Formal approval shall be sought from the Tender Committee, subject to availability of budget and before the implementation of the additional EPC. No post facto approval shall be entertained.
3. The Project Manager shall make any such variation by issuing written instructions to the Contractor and ensure that such variations are duly noted in the Site Order Register. A variation made shall not, in any way, vitiate or invalidate the Contract, but the effect, if any, of all such variations shall be valued in accordance with GCC Clause 36.
4. The Contractor shall execute and be bound by each Variation, unless the Contractor promptly gives notice to the Project Manager stating (with supporting particulars) that:
 - (a) the Contractor cannot readily obtain the Goods required for the Variation; or
 - (b) such Variation triggers a substantial change in the sequence of the progress of the EPC. Upon receiving this notice, the Project Manager shall cancel, confirm or vary the instruction.
5. All Variations shall be included in updated Programs produced by the Contractor.

38. Payments for variations

1. The Contractor shall provide the Project Manager analyzed rate for carrying out the Variation when requested to do so by the Project Manager. The Project Manager shall assess the analyzed rates, which shall be given within seven days of the request or within any longer period stated by the Project Manager and before the Variation is ordered.
2. If the EPC in the Variation corresponds with an item description in the Bill of Quantities and if, in the opinion of Project Manager, the quantity of EPC above the limit stated in GCC Sub-Clause 36.1 or the timing of its execution do not cause the cost per unit of quantity to change, the rate in the Bill of Quantities shall be used to calculate the value of the Variation. If the cost per unit of quantity changes, or if the nature or timing of the EPC in the Variation does not correspond with items in the Bill of Quantities, the quotation by the Contractor shall be in the form of new rates for the relevant items of work.
3. If the Contractor's quotation is unreasonable, the Project Manager may order the Variation and make a change to the Contract Price, which shall be based on the Project Manager's own forecast of the effects of the Variation on the Contractor's costs.
4. If the Project Manager decides that the urgency of varying the EPC would prevent a quotation being given and considered without delaying the EPC, no quotation shall be given and the Variation shall be treated as a Compensation Event.
5. The Contractor shall not be entitled to additional payment for costs that could have been avoided by giving early warning.

39. Payment Certificates

1. The Contractor shall submit to the Project Manager monthly Certificates statements of the value of the EPC executed, based on the Contractor's records, less the cumulative amount certified previously.
2. The value of EPC executed shall be determined by the Project Manager. The value of EPC executed shall comprise the value of the quantities of the items in the Bill of Quantities completed and measurement thereof shall be carried out jointly by the Project Manager, or his Representative, and the Contractor. The Project Manager, or his Representative, shall record the value of the EPC executed in a
